

Investment Objective and Strategy

3D ESG Equity ETF seeks long-term capital appreciation using exchange-traded funds (“ETFs”) to target risk-based exposure with a specific focus on environmental, socially-aware, and governance (ESG) principles. The strategy’s investment objective is to provide long-term superior risk-adjusted returns over the broad global equity benchmark as represented by the MSCI All-Country World Index (ACWI). 3D ESG Equities can be used as a stand-alone equity strategy or as a component within a risk-based asset allocation program (i.e. asset mixes targeting long-term capital market return objectives).

Investor Profile

Designed for investors with the highest risk tolerance who want to maximize their return potential and can handle high short-term account volatility and have an investment time horizon over ten years.

Disclaimer

3D/L Capital Management, LLC (incl predecessor entities) ("3D") is an investment management firm registered with the Securities and Exchange Commission, and for GIPS includes the predecessor firm 3D Asset Management which became 3D in December 2021. Registration with the SEC does not imply any level of expertise or training.

¹**Performance** 3D/L Capital Management, LLC (incl predecessor entities) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. 3D/L Capital Management, LLC (incl predecessor entities) has been independently verified for the periods Jul 1, 2006 - Dec 31, 2022. The 3D Global ESG Portfolio Composite includes all discretionary accounts that are managed to the 3D Global ESG Portfolio Strategy which uses exchange-traded funds (ETFs) and/or mutual funds to target 100% equity exposure. Net Composite Returns shown above represent the composite return of actual client accounts. Actual client costs will vary based on account size and total value of household assets. Performance data shown represents past performance.

²**Growth of \$100,000** shown in the chart represents the cumulative total return of the 3D Portfolio composite since inception, both gross and net of fees. Investment return and principal value of an investment with 3D Portfolios will fluctuate so that an investor's investment when redeemed may be worth more or less than their original cost. As with any investment strategy, there is a potential for profit as well as the possibility of loss.

³**Portfolio Characteristics** may change over time. Average Fund Expense is the weighted average fund expense ratio based on the portfolio allocation and ETF holdings. Number of Securities is the sum total of securities held within each ETF. Portfolio Yield is the sum of net dividend per share amounts that have gone ex-dividend over the prior 12 months, divided by the current stock price. The yield is helpful in estimating the amount of income that can be expected to be generated from a Portfolio. Standard Deviation is a measure of the portfolio's volatility based on the dispersion of historical monthly returns from the mean over a five year period. A higher standard deviation indicates higher volatility of returns. Sharpe Ratio is a measure of risk-adjusted performance that indicates whether excess return was generated by portfolio management decisions or by taking on additional risk. The risk-free rate assumed for this calculation is based on annualized returns of 90-Day U.S. Treasury Bills. A higher Sharpe Ratio indicates a higher risk-adjusted return and is generally favorable.

⁴**Portfolio Holdings** information is as of June 30, 2023. There is no assurance that the specific securities listed will remain in the Portfolio. Asset allocation and portfolio holdings may differ from the model among accounts in the composite. 3D employs a diversification strategy using index-based exchange-traded funds ("ETFs") to represent specific asset classes in the Portfolio and should not be considered a recommendation to buy or sell a particular ETF security. As with all investments, ETFs have risks. For more detailed information on the ETFs used in 3D Portfolios investors may request a prospectus by contacting their advisor. Performance is being shown for illustration purposes only and should not be relied upon. No representation or assurance is made that any investor will or is likely to achieve results comparable to those shown above or will make any profit or will be able to avoid incurring substantial losses. Past performance is not indicative, or a guarantee, of future results.
